OPENapp DALI at a glance.

As an all-around efficient and intelligent solution for light management, DEOS AG has developed a unique software application: **OPENapp DALI**. Centrally integrated into an OPEN 710/810 EMS + DALI, **OPENapp DALI** combines intuitive operability with the reliability of a high powered automation controller.

This makes **OPENapp DALI** the ideal and individual solution for all lighting control projects. During commissioning, operation and maintenance, you benefit from the following advantages:

- High flexibility
- Fully graphic configuration and central operation on the OPEN 710/810 EMS + DALI via a web server
- Powerful web server allows remote monitoring
- Reduced commissioning time
- Parameters are saved upon project completion
- Various security access levels
